① some PWR spent fuel pools can hold as much as 10 cores

② some BWR spent fuel pools can hold as much as 5 cores

③ After a spent fuel pool fills up, the oldest fuel can be put in dry cask storage.

→ The fuel pool that C. Boyd is modeling looks like a filled-up G.G. STP and ① has the G.G. STP dimensions.

④ His recollection is that

⑤ See webpage "[www.nrc.gov/opa/drycast/stdata.htm](http://www.nrc.gov/opa/drycast/stdata.htm)" for some important info on STP's.
