Subject: Spent Fuel Pool Regulatory Initiative

At 2:00 p.m. today, I attended a briefing for the Commissioners' TAs on the spent fuel pool regulatory initiative. The briefing was given by Rich Barrett, Glenn Kelly, Vonna Ordaz, Diane Jackson, and Stu Richards.

NRR briefed the TAs on the generic study on spent fuel pool risk and heat up performed over the last two months. In particular, they briefed the TAs on the Level 1 PRA done by Glenn Kelly and Michael Cheok, the MACCS calculations that I did, and the spent fuel pool heat up calculations using 1-D thermal hydraulics. NRR did not mention that RES did the MACCS calculations or that RES was doing 2-D and 3-D thermal hydraulics calculations. NRR is calling this generic study "preliminary," and they plan to have the national laboratories perform a peer review of this generic study beginning in August 1999.
