

5/21/99

Julie Gregory called.

- 1) I told her what I understood about chronic relocation
- 2) She said:

- In addition to the dose relocation criteria in chronic, there is a cost relocation criterion (see pg. 7-4, Test for Cost Effectiveness)
- I can ask for additional output/intermediate output (see page 7-44, Diagnostic Trace Option)
- I could compare results w/ QH0

~~Equation~~

$$\text{risk of fatality} = \frac{\text{accidents}}{\text{yr.}} \cdot \frac{\text{fatalities}}{\text{accident}}$$

(RQ 1.174?)
