**Subject:** Fwd: NEI MTG. SLIDES & THE LATEST

The attached e-mail gives the status of the spent fuel pool project and forwards the slides for today's meeting with NEI. According to the attached e-mail, the schedule for the generic study was revised last week; the original schedule was April-May 1999, and the revised schedule is April-Aug 1999. Also, the attached slides confirm that the generic study will be sent outside of the NRC for a peer review beginning at the end of Aug 1999. Finally, the RES work (i.e., MACCS consequence analysis and 2D/3D thermal-hydraulics) for the generic study is not mentioned in these slides.

I plan to attend today's meeting with NEI. It begins at 9:00 a.m.
