Subject: air oxidation of Zircaloy

Jason:

The Europeans are currently doing studies of air oxidation of Zircaloy. Some recent results were presented by W. Krauss and G. Shanz of FZK "Comparative studies on the Zry-4/air and Zry-4/O₂ reaction behaviour towards air ingress scenarios" at the 5th International QUENCH Workshop, Karlsruhe, Germany, 1999 October 19-21. Randy Gaunt and Chris Allison attended the workshop but I didn't see any representatives of the USNRC on the list of attendees. If you can't find a copy of the compilation of abstracts and handouts, I could FAX you a copy of the paper referred to above.

Regards,
Lawrence
