

NRE SEP report

1/21/00

I. Wing up CT and then up CT and FE.

• Improved since last —  
acknowledged slowly-erasing measure  
(perhaps response to our letter)

• 1. Deliberate or ingestion of Bire fires

• TH smt — Joe Darling  
— no COBA smt in report.

✓ { activities: hump acts  
normal circulation etc.

Arguing 9 occurrence  
~~Prevalence~~

1/21/00

II. Meeting CT + G Hubbard:

G Hubbard Plan:

1. Working the weekend getting the Appendices cleaned up.
2. Next week, we will be revising the main report.

RES questions

1. 5 yrs -- based on T H calls
2. 1 yr -- based on risk analysis was done at 1 year
3. largest benefit is associated w. evacuating early, not  
100line
4. SFP vs. op Rx. accident -- less prompt fatalities?  
Prompt fatalities might not be much different.
