

2/9/00

at 2:00pm on 2/9/00.  
F. Hubbard called. He said he revised my one  
sentence slightly to:

"Since the staff had radionuclide inventory  
data for a small BUR (Millstone 1), the  
staff adjusted the radionuclide inventory  
of Millstone 1 to represent a large BUR  
with a thermal power of 3441 MWt."

I said OK.
