Subject: MACCS calculations for spent fuel pool

I came by a few minutes ago, but you were away from your desk. I wanted to let you know that I spoke with Julie Gregory today. I let her know that I am in the available in case she has any questions on my input decks. She said that she hopes to have her calculations done by May 19 and the documentation of the calculations by May 31. She also said that she will have a better idea of a realistic schedule once she starts the work.

Charles Tinkler and I spoke with George Hubbard today. George said that the staff's response to the ACRS letter on spent fuel pool accidents is due to Gary Holahan by Friday, May 19. George also said that they need our (RES) input by Wednesday, May 17. Therefore, we need the results of Julie's calculations as soon as possible.

Thanks.
Jason
