

8/10/00

My w Tim Collins

Sequences

Seismic - air flow

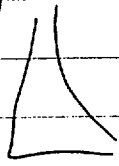

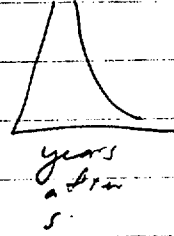

Non-seismic - air flow

Seismic - adiabatic (steam)

Non-seismic - adiabatic (steam)

I-79

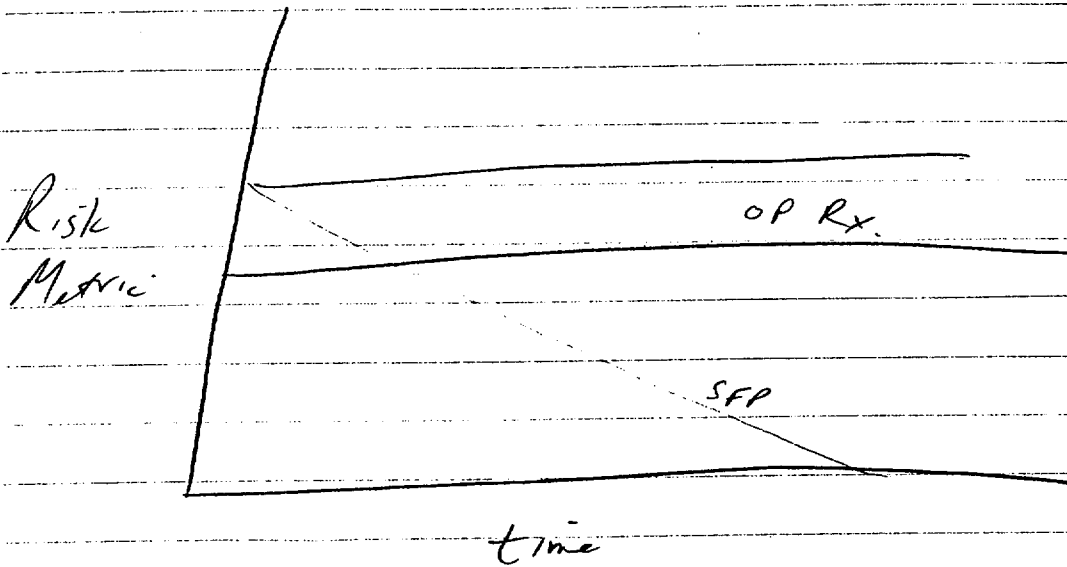

# EP Logic

Sequences	Time Needed By Glenn	Freq of Events	Consequences w/ w/o EP	Averted Consequences	Averted Risk
<u>air flow</u> Seismic Non-Seismic - boil off - carb drop			 years a day 5		
<u>hydro</u> seismic non-seismic - boil off - carb drop					

30 days, 1 yr, 2 yr, 5 yr, 10 yr - consequences

Check with my mgmt to see whether they will authorize the work.

## Insurance Question

Recoveries are not sensitive to time

Tim: Assume large S.T.

Joe: TH Code not running -- no info on cases other than adiabatic.

Report due to G/Holahan Aug 31

Jason: Let's do frequency as a function of time, too.

Tim Collins: OK

Jason: Should we include consequences in Ch. 3?

Tim Collins: Good question.

# Technical Study of Spent Fuel Pool Accidents for Decommissioning Plants

## Table of Contents

<i>Collins</i>	Executive Summary .....	1
<i>Hubbard</i>	1.0 Introduction .....	4
<i>Palla</i>	2.0 Risk-Informed Decision Making .....	5
	2.1 Principles of Regulatory Guide 1.174 .....	6
	2.1.1 Defense-in-Depth .....	7
	2.1.2 Safety Margins .....	8
	2.1.3 Impact of Proposed Changes .....	8
	2.1.4 Implementation and Monitoring Program .....	8
<i>Kelly</i>	3.0 Risk Assessment of Spent Fuel Pools at Decommissioning Plants .....	9
	3.1 Basis and Findings of SFP Risk Assessment .....	11
	3.2 Characteristics of SFP Design and Operations for a Decommissioning Plant ..	12
	3.3 Internal Event Scenarios Leading to Fuel Uncovery .....	18
	3.3.1 Loss of Cooling .....	18
	3.3.2 Loss of Coolant Inventory .....	19
	3.3.3 Loss of Off-site Power from Plant-Centered and Grid Related Events .....	20
	3.3.4 Loss of Off-site Power from Severe Weather Events .....	20
	3.3.5 Internal Fire .....	21
	3.3.6 Heavy Load Drops .....	21
	3.4 Beyond Design Basis Spent Fuel Pool Accident Scenarios (External Events) ..	23
	3.4.1 Seismic Events .....	23
	3.4.2 Aircraft Crashes .....	25
	3.4.3 Tornadoes .....	25
	3.4.4 Criticality in Spent Fuel Pool .....	26
?	3.5 <i>Consequences + Risk Assessment</i> .....	28
	4.0 Implications of Spent Fuel Pool Risk For Regulatory Requirements .....	29
	4.1. Summary of the Technical Results .....	29
	4.2 Risk Impact of Specific Design and Operational Characteristics .....	29
	4.2.1. Impact of Proposed Changes .....	30
	4.2.2. Defense-in-Depth .....	32
	4.2.3 Safety Margins .....	32
	4.2.4. Implementation and Monitoring Program .....	32
	4.3. Implications for Regulatory Requirements Related to Emergency Preparedness, Security and Insurance .....	33
	4.3.1 Emergency Preparedness .....	33
	4.3.2 Security .....	35
	4.3.3 Insurance .....	36
	5.0 Summary and Conclusions .....	37

6.0	References .....	39
7.0	Acronyms .....	41

## Appendices

<i>Joe + RES</i>	Appendix 1 Thermal Hydraulics .....	A1-1
<i>Acc. Freq.</i>	Appendix 2 Assessment of Spent Fuel Pool Risk at Decommissioning Plants .....	A2-1
<i>Kelly</i>	Appendix 2a Detailed Assessment of Risk from Decommissioning Plant Spent Fuel Pools .....	A2a-1
<i>Crowder X</i>	Appendix 2b Structural Integrity of Spent Fuel Pools Subject to Seismic Loads ..	A2b-1
	Appendix 2c Structural Integrity of Spent Fuel Pool Structures Subject to Heavy Loads Drops .....	A2c-1
	Appendix 2d Structural Integrity of Spent Fuel Pool Structures Subject to Aircraft Crashes .....	A2d-1
	Appendix 2e Structural Integrity of Spent Fuel Pool Structures Subject to Tornadoes .....	A2e-1
<i>U/SES</i>	Appendix 3 Criticality .....	A3-1
<i>Jason</i>	Appendix 4 Consequence Assessment from Zirconium Fire .....	A4-1
	<del>Appendix 5 Enhanced Seismic Checklist and Supporting Stakeholder Documentation ...</del>	<del>A5-1</del>
	Appendix 6 November 12, 1999 Nuclear Energy Institute Commitment Letter .....	A6-1
	Appendix 7 Stakeholder Interactions .....	A7-1
