

4/13/00

SFP Risk

- say "1 out of 200", not "99.5%"
- say "1 out of 20", not "95%"
- 99.5% number based on Canadian chemical spill where they evacuate 2 million people quickly
- Our response to NRR has to say "we do not agree with 95% evacuation."
- Use I + Cs release fractions from NUREG-1465
- Use I release fraction for Ru
- Only release FP's from 1 core (not 3.5)
