MEMORANDUM TO: File

FROM: Jack Cushing, Project Manager, Section 2
Project Directorate IV & Decommissioning
Division of Licensing Project Management
Office of Nuclear Reactor Regulation */RA/*

SUBJECT: REQUEST BY WESTINGHOUSE FOR A MEETING ON STAGGERED
ENGINEERED SAFETY FEATURES TESTING (ESF)

The attached e-mail was sent by Mr. Virgil Paggen of Westinghouse requesting a meeting with the staff to discuss staggered ESF testing on March 8, 2001. In subsequent phone conversations between the staff and Westinghouse, the meeting was re-scheduled for April 10, 2001, from 1:00 p.m. to 3:00 p.m.

Subject: Staggered ESF Testing

Jack:

This is to request a meeting with the staff on March 8, 2001, 1-3 p.m., to discuss a CEOG task concerning relaxation of testing requirements for engineered safety features. We will present the concept and methodology for justifying staggered ESF testing at this meeting; the purpose is to solicit staff concurrence and comments. A topical report will be prepared for staff review and approval as part of this task. Draft slides for this meeting are being prepared; these will be forwarded for staff information approximately one week prior to the meeting.

Please confirm whether appropriate reactor systems and tech spec staff can support the above schedule.

Regards... Virgil
