Moved to an Agreement State?	<input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No
Describe Follow-up: (Telephone, Internet, Chamber of Commerce, Other) Through telephone discussions with J. P. Causey, Sr. V.P., Chesapeake Corporation, Richmond, Virginia, the inspector determined that the wood treating plant had been sold in 1995 to Universal Forest Products, Inc., Grand Rapids, Virginia. After discussions with Scott Conklin, Director, Wood Preservation and Regulatory Affairs, the inspector determined that the plant was in that same year sold to Culpeper Wood Treating Company, Culpeper, Virginia. During discussions with Mike Rogers, the inspector determined that the licensee was not aware of possessing Model Nos. 8620 and LCA gauging devices, Serial Nos. 539 and 539, respectively. The inspector spoke with numerous individuals associated with activities at the former facility and those individuals (to include Jake Munson, Sr. Wood Technologist) did not recall the use of such devices.		

APPENDIX B

Describe Communication with Registration Vendor:

From those discussions with the representatives described above, the inspector determined that one of the devices in question (Model No. LCA, S/N 539) was in the possession of Timber Products, HCR-4, Box 49, Old Highway 60 E, Birchtree, MO 65438. The inspector verified this information through discussions with Gary Volk, Service Representative, ASOMA Instruments, Inc. The inspector then contacted a representative of Timber Products (Linda Richards, Administrative Executive, telephone number - 573-292-3185) and confirmed that they were in possession of the device. Ms. Richards informed the inspector that the device was being leased from Archwood Protection, 3941 Bonsal Road, Conley, Georgia 30288. The inspector confirmed this by speaking with Laurie Zeisel, Analytical Chemist at the Conley, GA facility (telephone number - 404-362-3970).

Vendor Follow-up Action:

None taken.

Final Action Taken:

None, based on the information received from the vendor, the inspector concluded that one of the devices identified by the contractor as being not accounted was the same one identified by the inspector as being in the possession of Timber Products, Birchtree, Missouri. However, the other two devices, Model Nos. 8620 and LCA, Serial Nos. 539 and 539, respectively, could not be located through the extensive efforts made by the inspector to contact the former employees as well as through the manufacturer. As a result, the inspector proposed that the case involving the two devices that could not be located be closed since the inspector exhausted all known resources to locate them.

Cause of Bad Address/Lesson Learned:

None identified.

September 28, 2000

Director of Nuclear Materials Safety and Safeguards
Attn: GLTS Manager
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Sir:

In response to Mr. Raddatz's inquiry dated September 22, 2000 (copy attached), I confirm, that to the best of my knowledge, Chesapeake Corporation is no longer in possession of the NRC licensed devices listed on the attached spreadsheet.

Although I am not familiar with a telephone conversation on April 17, 2000, I did receive a telephone call from an NRC contractor on August 25, 2000. The contractor I talked with on August 25 provided additional information indicating that the registered devices may have been related to a wood treating business conducted by a Chesapeake Corporation subsidiary, which operated near Fredericksburg, Virginia. Chesapeake's subsidiary sold the assets of the wood treating business, including the assets at the plant near Fredericksburg, in 1993. Documentation related to that sale does not indicate any disposition of the NRC registered devices in connection with that sale.

Based on information received from personnel with more direct knowledge of the Fredericksburg plant, the NRC registered devices may have been related to production of a specific product, fire retardant treated plywood. This would be consistent with the registration dates shown on the attached spreadsheet. Chesapeake discontinued the fire retardant treated plywood portion of its wood treating business in approximately 1990. If the NRC registered devices were related to that business, my assumption is that they were returned to the original vendor or otherwise disposed of at the time we stopped producing fire retardant treated plywood, but I am aware of no documentation we have to confirm that.

Sincerely,

Chesapeake Corporation
