MEMORANDUM TO: Robert A. Gramm, Chief, Section 1  
Project Directorate IV & Decommissioning  
Division of Licensing Project Management

FROM: Robert E. Moody, Project Manager, Section 1 */RA/*  
Project Directorate IV & Decommissioning  
Division of Licensing Project Management

SUBJECT: TERMINATION OF THE REVIEW OF DRAFT LICENSE AMENDMENT  
REQUEST (TAC NO. MB1279)

This memorandum is to document the termination of the review of the preliminary information provided by Entergy Operations, Inc. (the licensee) by letter dated February 23, 2001. The preliminary information related to a possible license amendment request for the River Bend Station, Unit 1, involving the Main Steam - Positive Leakage Control System (MS-PLCS), due to a 30-day Limiting Condition of Operation (LCO). The LCO was to expire on March 13, 2001, unless repairs to main steam line (MSL) shutoff valve B21-MOV-F098A could be successfully completed. A license amendment to allow the outboard MS-PLCS subsystem (Division 2) on MSL "A" to be inoperable until the next unit shutdown was being considered in the event the repair activities were unsuccessful.

The MSL shutoff valve repair activities were successful on February 28, 2001. Consequently, the licensee contacted the staff via telephone after the repairs were completed and requested all licensing activities related to the February 23, 2001, preliminary submittal be stopped.

Docket No. 50-458
