Leslie P. Foldesi, Director
Radiological Health Program
Virginia Department of Health
1500 East Main Street, Room 240
Richmond VA 23218

Dear Mr. Foldesi:

In reply to your request of March 7th, it is a pleasure to report that the Board of Directors of the Conference of Radiation Control Program Directors, Inc., has authorized a comprehensive review of radiation control in Virginia.

Some general information about the CRCPD review process and references to criteria for a model radiation control program are enclosed here.

Also enclosed is extensive data that your office provided years ago for CRCPD's "Profile of State and Local Radiation Control Programs." If you will return this with updates of the information written in, the reviewers will have a substantial extension of your March 7 comparisons of your current situation to that of 1985 as well as data to compare to the model program.

The CRCPD coordinator for this project will be Terry Devine, of this office. Please contact him to suggest a date for the review and to discuss details of objectives and procedure. He can then begin to draft the review team. Both you and the review team will identify officials that the review team will wish to interview, perhaps also facilities the team should visit, which must be taken into account in scheduling the review.

Best wishes for a successful review.

Sincerely,

Patricia C. Gorman
Deputy Director, CRCPD
