Ladies/Gentlemen:

DOCKETS 50-305, 50-266, AND 50-301  
KEWAUNEE NUCLEAR POWER PLANT  
POINT BEACH NUCLEAR PLANT, UNITS 1 AND 2  
IMPLEMENTATION OF REVISED 10 CFR 50.59

The effective date for the revised 10 CFR 50.59, was established in a December 13, 2000, Federal Register notice (65 FR 77773), as March 13, 2001. As discussed in Regulatory Issue Summary (RIS) 2001-03, dated January 23, 2001, the NRC has stated that to permit an orderly transition to the revised rule, licensees may implement the rule later than this date. Although an exemption is not necessary, the RIS suggested that a licensee may want to communicate its implementation plan to the NRC. It is our intention to implement the revised requirements of 10 CFR 50.59 before September 1, 2001, at the Kewaunee and Point Beach Plants. Until that time, we will continue to implement our existing 10 CFR 50.59 review processes. For evaluations begun prior to implementation of the revised requirements, we will complete the evaluations in accordance with the rule in effect prior to March 13, 2001.

Implementation of the revised requirements includes developing new procedures and training personnel at the Kewaunee and Point Beach Plants. To reduce the demands on plant staff and schedules, the training will be conducted subsequent to the Point Beach Unit 1 refueling outage (expected to end on May 19, 2001), and prior to the Kewaunee refueling and Steam Generator Replacement outage (planned to begin on September 23, 2001). Therefore, implementation of the revised 10 CFR 50.59 is expected to be completed by September 7, 2001.
