**Subject:** NRR Assistance in Harris Adjudicatory Matter

In response to your March 21, 2001 memorandum to John Craig for staff assistance in reviewing an ASLB ruling on the Harris spent fuel pool expansion license amendment, we are proposing the following staff who could assist you.

Quality Assurance Issues - Richard McIntyre 415-3215  
Severe Accident Scenario Issues -  
    Michael Cheok 415-8380  
    Mark Rubin 415-3234  
    Glenn Kelly 415-1075

We believe that the need for a construction permit is a legal issue rather than a technical issue and we suggest that it be referred to OGC.

This completes NRR's effort on the green ticket action, EDO Control: G 20010110.
