IVE.....MATERIAL USED BY MATERIAL LICENSEES, .....  
 .....2:00 P.M., TUESDAY, JULY 5, 1988, .....CO  
 MMISSIONERS' CONFERENCE ROOM, ONE.....WHITE FLINT NOR  
 TH, ROCKVILLE, MARYLAND.....(OPEN TO PUBLIC ATTENDANC  
 E).....The Commission\* was briefed by the NRC staff on the NRC's  
 programs for accountability and traceability of radioactive materials.  
 Chairman Zech emphasized that the staff needs to focus their priorities and  
 allocate resources based upon the risk to the public health and safety.  
 The Commission agree  
 d that IAEA officials should be approached in regard to increasing IAE  
 A's role in notifying and assisting in the areas of accidents and cont  
 amination events involving radioactive materials other than reactors.  
 Chairman Zech requested that the staff examine ways to determine if t  
 here are problems occurring with regard to accountability of radioacti  
 ve materials which are not being reported to the NRC and to identify w  
 ays of finding those problems. Chairman Zech noted that if the staff  
 determined that there was a need for additional regulatory actions to  
 protect the public health and safety, it should be brought to the Comm  
 ission's attention. cc: Chairman Zech.....Commissioner Roberts.....
