April 4, 2001

U. S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, DC 20555

Subject: McGuire Nuclear Station, Units 1 and 2
Docket Nos. 50-369 and 50-370
Proposed Revision to Technical Specifications (TS)
Submittal dated February 14, 2001
TAC Numbers MB1261 and MB1262

Duke Energy requests that the NRC suspend review of the subject TS change submittal until further notice. The subject TS change submittal includes McGuire Pressure and Temperature (P/T) limit curves extended to 34 Effective Full Power Years. Westinghouse has identified an error in the computer code used to generate the proposed P/T curves. These curves were included in both the proposed TS change submittal and WCAPs 15192 and 15201. The WCAPs will have to be revised by Westinghouse. Duke Energy will then evaluate the effect of the error on the submittal. Westinghouse plans to re-issue the WCAPs to Duke Energy by the end of April 2001.

Duke Energy will advise the NRC Project Manager of this review by May 30, 2001 and either supplement the original submittal or request the withdrawal of the submittal. If there are any questions regarding this submittal, please contact P. T. Vu at (704) 875-4302.
