

WHAT DO WE NEED?

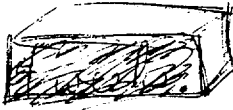

- * Provide a quantified risk analysis like the loss of cooling case previously supplied by Soli. The writeup should be well written with a complete description of all events, success criteria, assumptions, references, etc. with all dependencies documented.
- * Provide backup sheets for the HRA analysis.
- * Provide ETs and FTs.
- * Provide summary of ET findings.
- * Products supplied MUST be in Wordperfect.

The product we receive should be essentially ready to be added to a paper to the NRC Commissioners as an appendix explaining the requantified risk assessment of decommissioning plants.

Jan 28th to Gary

What do I need from Tim
When do I need it.

What add people here?

~~Robert~~

document dependencies
well written; full description;
all references; id word perfect.
use loss of cooling case as
a model.

1) quantified risk, anyl like loss of cooling case w/
complete desc. of all events, success criteria, assumption.

2). backup sheets for HRA.

3). ETs + FTs

4) Summed up:

~~Loss of inventory~~

* draft as they complete them.

next week { - loss of invent
- Loss of osp - severe weather

} Have th not here
next week.

early 1st week in Jan { - LOSP
- fires
- heavy loads, aircraft +

Glen:

Tim called. He says that is a 70 page report that explains everything. Tim will see what he can do to get it re-transmitted.
