

Dontam says in  
Vanna O'Day  
North Buxton

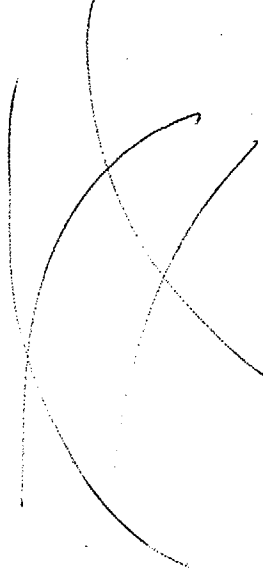

5/3/99

with check  
ME

SFP Seismic

1.

HCLPF  $\geq 3 \times SSE$

w/ exception from  
Gontam

$\Rightarrow \sim 10^{-6}$  return period

1. Gontam to provide seismic outliers + criteria

2. " " things to check for when doing SFP

HCLPF calculation.

3. Convolution + check  $.05 \times HCLPF$  (Robinson + Vermont Yankee)

2. Gontam says BWR will fail on cash drop.

Can I define load + limits - the height?

due in a  
couple of  
days

Give To Gontam

#5 pipe diameter + metal type

Thickness of pipe + pipe materials

To Gontam

4/5/99

5/3/99

Mike Cheek  
Me

Vonna O'day  
Jim

"I case run kinda like NR-1150 calculations"

95% evacuate

5% don't

use  $Q_{\text{Pass}}$  wind stability. NR-1150 use  $Q_{\text{Pass}}$  A

[Charlie Tinkler + Jason ~~run~~ away this week]

Jim - plume duration  
timing of evacuation  
population density

Can use uniform met + pop density? Yes.
