**Subject:** Re: [Fwd: TROUBLE FOR NRC, CP&L]

SPLB is meeting with the ACRS on June 7 at 8:30 to 10:00 to discuss closure of GSI 173A. GSI 173A deals with SFP issues at operating reactors. Since the Harris hearings are ongoing, we would like some input relative to how much we can say, if asked, that might apply to the hearings. Right now our presentation is focused on work we did in the past, but we understand that we are open to additional questions that may come up (including questions on the decommissioning study and Harris hearings). Can someone get with Chris and I with some guidance relative to the hearings?

Thanks,

George Hubbard
