

April 16, 2001

LICENSEE: Southern Nuclear Operating Company

FACILITIES: Farley Nuclear Plant, Units 1 and 2

SUBJECT: MEETING SUMMARY - MEETING OF MARCH 27, 2001, REGARDING
KAOWOOL FIRE BARRIERS

On March 27, 2001, the staff met with Southern Nuclear Operating Company (SNC) personnel to discuss SNC's plans and schedule for addressing the issue of Kaowool fire barriers at the Farley Nuclear Plant, Units 1 and 2. Staff from Bechtel Power Corporation, which are consultants to SNC, also attended this meeting. Enclosure 1 lists the meeting participants.

SNC provided a brief history of Kaowool fire barriers at the Farley facility, identified the areas that are subject to Appendix R analysis, and discussed their preliminary plans. SNC plans to make modifications and address any applicable operator actions, as described in their handout (Enclosure 2). At this time, SNC has not selected specific options or a schedule for implementing corrective actions, but SNC indicated that a five-year period would be reasonable. SNC continues to employ fire watched as a compensatory safety measure in the areas where the Kaowool fire barriers are located.
