Sam Collins

6/4/99

Put forward findings saying where we are + what comes next.

Made decisions in past

plant-spec

continuing to make decisions

no need to change yet based on prelim.

up front Context of where we are in time in process (talk up front on where we are).

"Not as straight forward as previously thought"

"Our review did not limit ourselves to seismic"

"Too early in process to make decisions"

Still in the information arena, need to apply it to the process in time and appropriateness.

"Eventually applied to our processes: backfit, ^{at decom plant,} oper rx, relief."

If we find anything so ^{safety} significant, we will enter the regulatory process.

at beginning
& at end, "What does all this mean?"
where are we in the process?
