Attention: Isotopes Branch, Division of Licensing and Regulation

Gentlemen:

We have just received the June 7, 1961, renewal of our AEC License No. 31-461-10, Amendment No. 7 (F63).

Item No. 8C on this license states "2,500 sources of 100 millicuries each. Total 45 curies."

The above entry is in error. If you will refer to our April 27, 1961, application, you will see Item 8C to be stated "2,500 sources, not to exceed 100 mc. each. Total not to exceed 45 curies."

We would appreciate your co-operation in making this correction in our License No. 31-461-10. Please reply directly to the undersigned.

Very truly yours,

Richard F. Scherberger  
Laboratory of Industrial Medicine
