New York, New York 10014

Attn: Region Director

Dear Sir:

*This request was discussed with Garrett by phone. A copy of AEC Forms 3, 4 & 5 as well as a list 34 was mailed to him. Also a copy of June 67 AEC Regulatory Guide - Industrial Radiography.*

The Radiography Markets Division, Eastman Kodak Company is planning to present courses in Industrial Radiography in various parts of the country. The first courses will be presented in our Marketing Education Center at Atlanta, Georgia, on December 4 through 15, 1967, and February 5 through 16, 1968. Future dates for courses at this location will be announced soon. Other locations are planned and will also be announced in the future.

Although there will not be any facilities for the use of gamma sources in the Atlanta facility, we are including the instruction for gamma radiography, radiation safety and a section on AEC Rules and Regulations. It is in this connection that I write to you. Can you supply us with copies of 10CFR, Parts 20, 30 and 34? Your office did send me a few copies for my use in course preparation. These copies, though fine for that purpose, were not of a quality that we could use them for reproduction. We will be happy to make our own copies for distribution to our students if we can obtain good quality originals. We should also have good originals of AEC Forms 3, 4, and 5.

In addition, if you have any educational materials which might fit the requirements of our courses, we would be very appreciative of the opportunity to use them.

Classes will be industrial people from radiographic departments, QC, engineering and management. Each class will be no larger than 16 people.

We want to make our courses as informative and meaningful as possible. Anything you can contribute to this goal will be greatly appreciated.

Sincerely,

*W. R. Garrett*
