Mr. Mark Reddemann
Site Vice President
Kewaunee and Point Beach Nuclear Power Plants
Nuclear Management Company, LLC
6610 Nuclear Road
Two Rivers, WI 54241

SUBJECT: POINT BEACH NUCLEAR PLANT, UNITS 1 AND 2 - COMPLETION OF
LICENSING ACTION FOR GENERIC LETTER 98-02, "LOSS OF REACTOR
COOLANT INVENTORY AND ASSOCIATED POTENTIAL FOR LOSS OF
EMERGENCY MITIGATION FUNCTION WHILE IN A SHUTDOWN CONDITION"
(TAC NOS. MA4798 AND MA4799)

Dear Mr. Reddemann:

On May 28, 1998, the U.S. Nuclear Regulatory Commission (NRC) issued Generic Letter (GL) 98-02 to all holders of operating licenses for pressurized-water reactors (PWRs), except those who have permanently ceased operations, and have certified that fuel has been permanently removed from the reactor vessel. The NRC issued GL 98-02 to request that PWR licensees evaluate a September 17, 1994, event, that occurred at Wolf Creek, which had the potential to drain-down the reactor coolant system (RCS) to the refueling water storage tank (RWST) and, at the same time, render the emergency core cooling system (ECCS) and residual heat removal (RHR) system inoperable by introducing a steam/water mixture to the suction side of the ECCS and RHR pumps. Addressees of GL 98-02 were requested to provide the following information within 180 days: (1) an assessment of whether the addressee's facility is vulnerable to the September 17, 1994, Wolf Creek event, and (2) if the facility is found to be vulnerable, an assessment of the plant-specific 10 CFR Part 50, Appendix B, quality assurance program attributes that will prevent the subject event. If the addressee's facility was determined to be vulnerable, a response to information item (1) was to be provided pursuant to 10 CFR 50.54(f) and 10 CFR 50.4, and the responses to information items (1) and (2) were to be kept in a licensee's retrievable system for use by the NRC staff on an as-needed basis.

In response to GL 98-02, you provided a letter dated November 24, 1998, for Point Beach Nuclear Plant (PBNP), Units 1 and 2. The submittal indicated that PBNP, Units 1 and 2, were vulnerable to the type of incident which occurred at Wolf Creek and further indicated that the plant evaluation concerning the subject vulnerability (information item (2) of GL 98-02), was being kept in a retrievable licensee system that the NRC can verify on an as-needed or sample basis, in accordance with GL 98-02.

By letter dated July 28, 2000, the NRC's Region III staff issued NRC Inspection Report No. 50-266/2000007 (DRP);50-301/2000007(DRP). The subject inspection report contained details of the NRC staff's on-site verification of activities which you undertook in response to GL 98-02 for PBNP, Units 1 and 2. Specifically, the inspectors verified that you had effectively implemented administrative controls, configuration management, and operating procedures to preclude an inadvertent drain-down event as described in GL 98-02.

M. Reddemann

- 2 -

The NRC staff has reviewed your response to GL 98-02 and has concluded that (1) all the information requested by GL 98-02 has been provided, and (2) that your on-site activities adequately addressed the concerns of GL 98-02 for PBNP, Units 1 and 2; therefore, we consider GL 98-02 to be closed for PBNP, Units 1 and 2.

Sincerely,

/RA/

Beth Wetzel, Senior Project Manager, Section 1
Project Directorate III
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

Docket Nos. 50-266 and 50-301
