Subject: Re: RES concurrence

Monday at 9:00 is OK with me. Is resolution of this issue all that is required to clear the way for RES concurrence?

Charlie and Jason came over late Friday and had some concerns regarding the report? If I understood or remember correctly their major concerns pertain to the fact that we say seismic is the major contributor to risk; however, we seem to be focusing on the benefits of any accident being slow moving and that early evacuation is beneficial. If seismic is the main contributor can we take credit for the accident being slow moving. Additionally, I don't believe they see a large difference between early fatalities without early evacuation and early fatalities with early evacuation. Based on their input. I told them that I would set up a meeting with you to discuss their concerns. When can you meet with them? Is Monday at 9:00 o.k. If not let me know and I'll set up another time. I believe they have discussed their concerns with Farouk.

I have their package with their comments in my office if you want to see them before we meet.

Thanks,

George Hubbard

P.S. I also have comments from Stu Richards and we probably will need to meet with him also. I'll make copies of his general comments and pass them around.
