Subject: Fwd: Brief EDO on response to the ACRS letter on decommissioning risk

Recognizing that your email on our schedule indicated that you could not support a April 25 date for providing input to the response since the ACRS was asking major questions and you wanted to gather additional information before responding to the ACRS, can you give me a date when you can have input to us? Considering the interest on this and the fact that a large portion of the ACRS letter pertains to your Branch's area, we will need input from you ASAP. We will be meeting today or tomorrow in DSSA on refining our approach in responding to the ACRS letter. Let me know if you would like to attend.

Thanks,

George Hubbard

Subject: Brief EDO on response to the ACRS letter on decommissioning risk

Mike Tschiltz called today and asked that the EDO and Deputy EDO's be briefed on the staff response to the ACRS letter on decommissioning risk. I told Mike that the TWG was already working on an outline of a response and that we would work the issue up the chain of command.

George - Projects will work with you to set dates to brief the issue.
