Subject: ACRS Meeting on Decommissioning

We will be meeting with the ACRS on April 5, 2000 from 8:30 to 10:30 to discuss our draft final report on decommissioning. ~~Glenn Kelly will be making the presentation~~ and your attendance is requested to support Glenn in case the ACRS asks questions for which Glenn needs your assistance. He will call on you when needed. Glenn's presentation will be based on the presentation that was made to the Commissioners' TAs with backup slides as needed.

So far we have received no feedback from the ACRS on specific topics. I'll be checking with them later this week.

Also, I have not heard whether NEI or anyone from the public will be making a presentation.

Mike and Jason (and probably Joe) should be prepared to address issues raised by the ACRS at the previous meeting. These include (a) air oxidation kinetics and subsequent fuel damage behavior; (b) releases of ruthenium and uranium trioxide aerosols, and (c) fuel burnup and hydriding.

Goutam, I understand Bob Kennedy will be in attendance.

Bob Skelton, I don't think the ACRS had any questions on safeguards in the last meeting but you may want to attend. It's your choice.

Faulk, since Jim O'Brien is no longer with the agency you may want to come or have someone from EP there. I don't recall any EP issues at the last meeting.

If I've missed anyone that you think needs to be there let me know.

Thanks for your support,

George Hubbard
