Subject: Re: ACRS Subcommittee Meeting

Med,

Our plan is to provide the committee a copy of the report after it has division level concurrence.. we are shooting for Thursday of next week (10/12).

As I see it for the meeting, we would focus on describing what was done to address the more significant comments on the February draft: Effect of large ruthenium release; partial draindown, use of EPRI vs LLNL hazard curves. Then we would discuss any revisions to the February report recommendations.

Tim

Hi Tim; we need to discuss what material would be available for the October 18, 2000 ACRS Subcommittee meeting regarding the SFP issue. We also have to structure an agenda. Please let me know. Thanks.
