[REDACTED] b, 7C
SUBJECT: LETTER OF FEBRUARY 24, 2000
[REDACTED] 7C

This is in reference to your letter dated February 24, 2000, in response to our letter of February 18, 2000. In your letter, you indicated that you still had questions on the concerns you identified to us [REDACTED] These concerns related to the emergency sirens around the Shearon Harris Nuclear Power Plant (NPP) and system pipe wall thickness at Shearon Harris NPP. We have reviewed the additional information provided in your February 24, 2000, letter and determined that you did not provide us with new information related to these concerns. We feel that we adequately addressed your concerns in our February 18 letter to you. Additionally, we are satisfied from our review of these issues, that during the Shearon Harris NPP licensing process, these concerns were adequately addressed. Also, we are confident that should safety issues emerge, they would be identified by our current inspections that cover the Shearon Harris NPP maintenance, engineering and emergency preparedness programs.

We take our safety responsibilities to the public very seriously and will continue to do so within the bounds of our lawful authority. Unless the NRC receives additional specific information that suggests that our conclusions should be altered, we plan no further action on this matter. Should you have additional questions, or if I can be of further assistance you may contact me at (404) 562-4560.

Sincerely,

/ RA/

Brian R. Bonser, Chief
