**Subject:** Re: Revision:Seismic Risk: Spent Fuel Pool Failures at 69 Sites

Those numbers are not in the Kennedy report - it is like truncation!!! You know that they are below  $1 \times 10^{-6}$  and nothing more!!

Thank you,  
Goutam

Thanks, Goutam. I am afraid I did not make my request clear enough. What I need is a description of the return period of the seismic risk at the 34 sites that are below  $1 \times 10^{-6}$  per year.
