**Subject:** Decommissioning Funding Plan 29-00139-02, 03005222, 129446

Michael:

I just spoke with Frank Costello regarding your decommissioning funding plan which according to License Condition 24 of your -02 license is due on June 1, 2001. I informed him that you planned to ask for an extension.

Frank said that since you are decommissioning building 124, you should wait until that is finished before you send in your funding plan. That way your funding plan need only address the remaining facilities and your R&D program.

Please send me an e-mail or fax in a letter, and reference control number 129446. Request an extension on your funding plan until completion of decommissioning of building 124. I will add the extension of the due date for the decommissioning funding plan to the amendment concerning building 81 and get it out next week.

We will need to have a firm date for receipt of the funding plan. I know this will be difficult to project do to all the possible delays that may effect completion of the decommissioning of building 124. However, give us your best estimate and we will work with that.

**CC:** Frank Costello, John Kinneman
