Steve:

Our reviewer Chia-Fu (Simon) Sheng is reviewing your 3/8/01 submittal on reactor vessel material surveillance. He has the following comments/questions:

In Table 7-1 of the surveillance report, NMPC did not report the best-estimate chemistry data for Weld 4P7216 (single) and 4P7216 (tandem) that was reported to NRC in NMPC's November 20, 1995 response to GL 92-01, Rev. 1, Supplement 1. Instead, Table 7-1 reported the plant-specific chemistry data for these two welds which were reported to NRC in the NMPC's original response to GL 92-01, Rev. 1. Please verify if this is a mistake, or confirm NMPC's intention to use the more conservative plant-specific data in future vessel integrity evaluations.

A simple e-mail would suffice. However, if you want to talk, we can always accommodate.  
Thanks.
