Subject: Re:

Dear Sergio,

Thanks so very much for your thoughtful holiday gift. It was a very nice surprise. How was your New Year's celebration? Although I was at the Emergency Operations Center on New Year's Eve with the Chairman, Commissioner Merrifield and 40 other NRC staffers, it turned out to be rather uneventful. However, I suppose that is a good thing.

I'm sorry to inform you that the February PRA class has been canceled. They are scheduling one for July 2000. I can enroll your colleague in that one if you like.

I understand that last Thursday Greenpeace demanded an independent audit of security at Laguna Verde NPP. They apparently reported that WANO gave it a five on their one-to five scale. We encounter similar groups in the US and it is always a challenge to respond so that the discussions don't escalate even further.

When I was in Mexico City last April, I mentioned that the IAEA wanted to provide training on the RELAP5 code to the University in Mexico. I was recently asked if our office would support such training. My initial reaction is that the regulatory body should be involved in some way and derive some benefit. What is the CNSNS position on the IAEA providing RELAP5 to the University and does the University support your agency in anyway? Any update you can provide would be useful.

Best Regards,

Donna-Marie
