Acting Chief, U.S. N.P.C.
Policy, Executive Branch, Div. of Admin. Services,
Office of Administration,
May 15 2001

Dear Sir,

Thank you for the opportunity
to comment on the new fuel
fabrication facility slated for
the Savannah River site in
South Carolina.

I want my for plating
to be used to minimize the
bomb grade plutonium. The
way the weapons grade
plutonium mixed? he so
highly radioactive the
plutonium would be that
poor, and the biggest reason
to because there should be so
much less waste to deal with.
I want the N.P.C. to
along the M.O. X. because
I think you and everyone
at the N.P.C. for making
decisions that our future
generations can successfully
live with.

Sincerely, Peter Fox App
