I completely oppose the use of plutonium by Duke Power. I live in Denver, N.C. and am trying to raise a healthy family. I have a 10 month old son + my husband + I own land here that we farm on. We are organic farmers + grow our own food. We are employed by the Center City Partners to sell our produce at the Green Market in downtown Charlotte. We will do everything we can to object the use of plutonium in our community. Please consider that as it may save money for Duke Power the cost maybe lives. Humans make mistakes... we do not want to be subjected to one of yours.

Sincerely

Concerned Kristin Smolen
