Dear Mr. Lesar: I am writing to urge you to further consider the idea of using plutonium at the Maguire and Catawba nuclear power plants here on Lake Norman in North Carolina. The population has exploded here since Duke Energy was given it's original license and there is absolutely no way the area could be evacuated within any meaningful time constraints. If this is an experiment that needs to be conducted I would seriously suggest you do it in your backyard not mine. Sincerely your, M. Jean Lyons
