5/8/01

Dear Mr. Lesar:

I am writing you to express my adamant objections to a possible "plutonium fuel factory" at the Savannah River Site. I would be opposed to such a controversial and experimental fuel factory anywhere on the continent, but most especially in my home state.

This type of fuel has never been used anywhere in the world and this first-of-a-kind plant is just plain risky.

Please consider all the risks and do not license this facility.

Sincerely,

Judy Ponder
