**Subject:** RE: Deletion of ISEG from TS

This is to confirm SCE&G's commitments based on our 2:00 PM telephone call on June 13, 2001. During the telephone call, V. C Summer agreed to capture certain requirements in our Operational Quality Assurance Plan (OQAP) and FSAR at the next update of those documents. Specifically, SCE&G agrees to include the following in the OQAP:

2.3.3.A.2 Management of the Independent Safety Engineering Group (ISEG)

Independent safety review is performed in accordance with the functions described in NUREG-0737, Item I.B.1.2. These reviews include reviews of plant activities to verify compliance to the operating license and may include plant operating characteristics, NRC issues, industry advisories, or others.

The same commitments will also be reflected in Chapter 17.2 of the FSAR at the next regular update.
