SUBJECT: REQUALIFICATION PROGRAM INSPECTION

Dear Mr. Kingsley:

In a telephone conversation on September 4, 2001, Mr. F. Tsakeres, Training Manager, and Mr. H. Peterson, Senior Operations Specialist, made arrangements for the NRC to inspect the licensed operator requalification program at the Clinton Nuclear Power Station. To accommodate the requalification training schedule changes, the originally scheduled inspection for the weeks of October 1 and November 12, 2001, per our letter dated August 2, 2001, will be changed. The inspection is now planned for only the week of November 12, 2001, which coincides with your revised requalification examination cycle. The staff at your facility should prepare and conduct the requalification examinations in accordance with your NRC-approved requalification program.

In accordance with 10 CFR 55.59(c), the NRC may request facility licensees to submit their comprehensive requalification written examinations or annual operating tests as necessary to support the NRC's inspection program needs. In order for the NRC to adequately prepare for this inspection, please furnish the written examinations and operating tests scheduled for the week of the inspection to the NRC by November 5, 2001. Mr. Tsakeres has been advised of this request and provided with the name and address of the NRC lead inspector assigned to this inspection.

The NRC may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.
