Subject: Westinghouse Reorganization Notice

Reference: J. S. Galembush letter LTR-NRC-00-5982 to T. R. Quay dated September 21, 2000

Dear Mr. Quay:

The above reference provided for your information the Westinghouse Quality Management System (QMS) document, Revision 4. Figure 1 of the QMS identified those operational organizations within Westinghouse that meet the requirements of the QMS. It reflected the operational integration of the former ABB C-E Nuclear Power organizations that had been acquired by Westinghouse. Subsequent to this, reorganization was implemented to simplify and streamline the organization as the integration of the former ABB organizations was completed.

The requirements and commitments of the QMS are maintained without change or reduction. This notice is provided to the NRC according to our QMS commitment.

"Official record electronically approved in EDMS 2000"

The significant organizational changes illustrated in the attached figure are as follows:

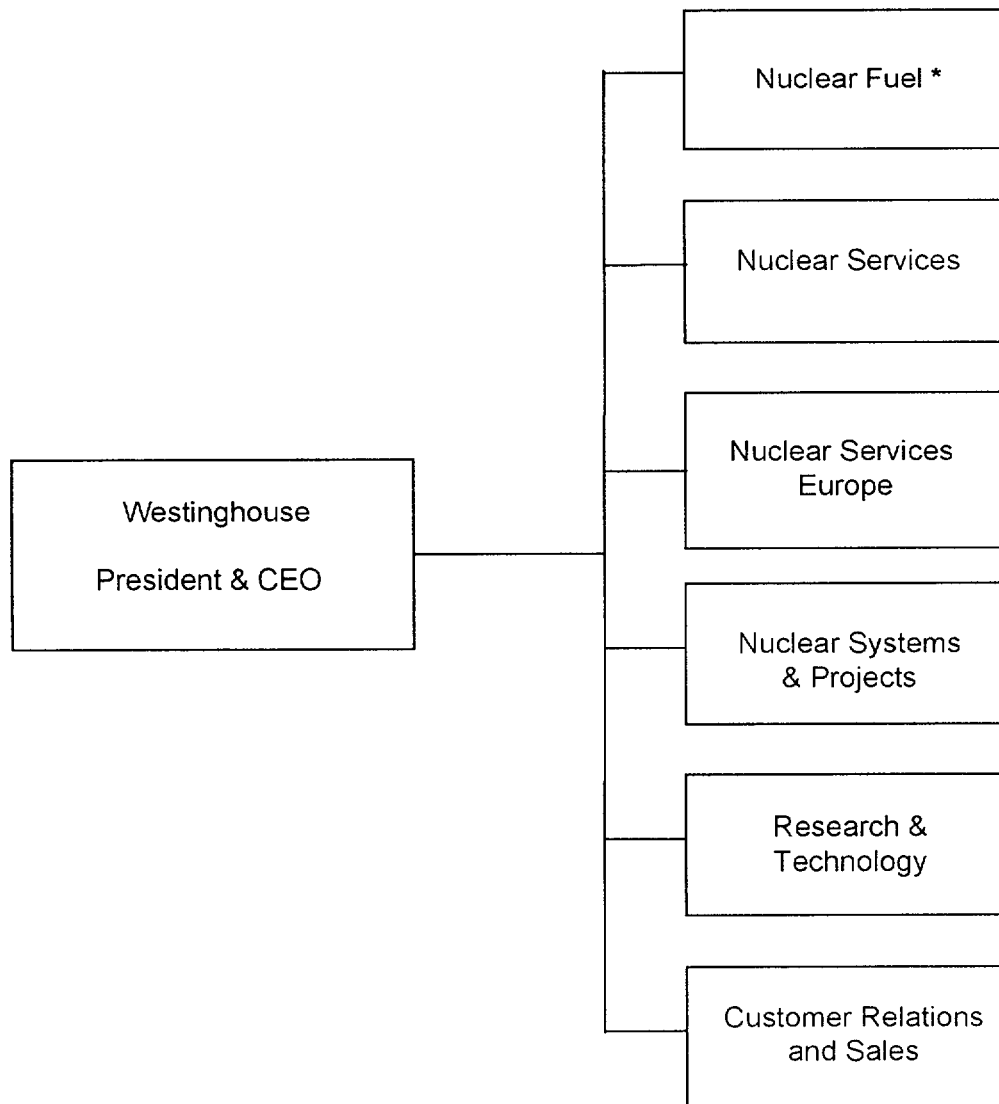

- The Nuclear Systems and Nuclear Automation businesses were combined into a single Nuclear Systems & Projects operational organization.
- The various business activities contained in the Westinghouse Atom business were integrated and aligned with the Nuclear Fuel, Nuclear Services Europe, and Nuclear Systems & Projects operational organizations.

If there are any questions, please contact John Papai at (412) 374-2434.

A handwritten signature in black ink, appearing to read "H. A. Sepp".

H. A. Sepp, Manager
Regulatory & Licensing Engineering
