

SUMMARY OF INFORMATION COLLECTION REQUEST

Title: Incorporation of License Conditions into 10 CFR Part 30, "Rules of General Applicability to Domestic Licensing of Byproduct Material"

Current Burden/Responses: 158,788 hours/1,718 responses

Proposed Burden/Responses: 160,919 hours/2,285 responses

Frequency of Response: On occasion

Number of Respondents: 6,552

Reasons for Changes in Burden/Responses:

The 10 CFR Part 30 clearance approval is being revised to add the burden for license conditions, which has not previously been captured in the clearance package. The burden for the license conditions will add 2,131 hours to the currently approved clearance.

Level of Concurrence: Branch Chief
Rulemaking and Guidance Branch
Division of Industrial and Medical Nuclear Safety
Office of Nuclear Material Safety and Safeguards

Recordkeeping Requirements in Accordance with the Retention Periods for Records Rule: Record retentions are in accordance with standard retentions.

Search of the Information Requirements Control Automated System (IRCAS):
IRCAS was searched on February 1, 2001. No duplication was found.

Abstract:

10 CFR Part 30 establishes rules applicable to all persons in the United States, governing domestic licensing of radioactive byproduct material. The NRC has identified two sections of Part 30 that contain burden that has not been previously captured in the supporting statement for Part 30. In 10 CFR 30.34(b), the NRC requires the submittal of information that may not have been required on the previously submitted NRC Form 313, "Application for Material License." In addition, section 30.34(e)(4) permits the NRC to impose additional conditions in the license under certain circumstances. These conditions may require additional reporting and recordkeeping. The conditions are used in conjunction with the requirements in Title 10 of the Code of Federal Regulations.
