Dear Secretary of the Nuclear Regulatory Commission,

I understand that the NRC is proposing to change its rules in a manner which would reduce public input and participation in nuclear licensing hearings. I am opposed to those rule changes. The public is entitled to full and meaningful participation in a licensing process which must provide a complete record. The nuclear industry must be required to defend its proposals in formal public hearings, as Congress intended when it passed the Atomic Energy Act in 1954.

Thank you,
