Mr. J. A. Price  
Vice President - Nuclear Technical Services - Millstone  
Dominion Nuclear Connecticut, Inc.  
c/o Mr. David A. Smith  
Rope Ferry Road  
Waterford, CT 06385

SUBJECT: MILLSTONE NUCLEAR POWER STATION, UNIT NO 3 - LEAKAGE  
COLLECTION AND RELEASE SYSTEM (TAC NO. MB1544)

Dear Mr. Price:

By letter dated September 21, 2001, you requested the U.S. Nuclear Regulatory Commission (NRC) to suspend the review of your license amendment request dated June 28, 1998, until a revised calculation related to the dose consequences is completed and submitted for NRC review. This revised calculation will use NRC-approved methodology to replace your enhanced mixing model to quantify the containment spray mixing rate.

As a note of clarification, the original license amendment request of June 28, 1998, was replaced and included in a revision dated September 28, 2000, that the NRC has been reviewing. Your staff and I agree that the suspended review will apply to the September 28, 2000, request.

This letter is to inform you that, per your request, we are closing our review and closing TAC No. MB1544 assigned to track the NRC work effort associated with the NRC review of the September 28, 2000, license amendment request so no further charges against this TAC No. should appear after the date of this letter. We understand that your proposed submittal will replace your September 28, 2000, license amendment request. At such time, the NRC will establish a new TAC No. to conduct our review of this new submittal. If you have any questions, please contact me at (301) 415-1484.

Sincerely,

**/RA/**
