LaSalle County Station, Unit 1  
Facility Operating License No. NPF-11  
NRC Docket No. 50-373

Subject: Request for Inspection Date Change Due to Refueling Outage  
Start Date Change

Reference: Letter from C. G. Pardee (Exelon) to James Dyer, (U.S. NRC),  
"Refueling Outage Start Date Change," dated August 31, 2001.

The purpose of this letter is to request rescheduling of the Safety System Design and Performance Capability (Inspection Procedure 71111.21) inspection. This inspection is currently scheduled for January 14 through February 1, 2002. In the letter dated August 31, 2001, (Reference) Exelon Generation Company (EGC), LLC, informed you that we have rescheduled the start of the LaSalle County Station Unit 1 refueling outage from November 24, 2001 to January 10, 2002. Due to the unavailability of the resources necessary to support your inspection efforts during the refueling outage, Exelon is requesting that the Safety System Design and Performance Capability inspection be rescheduled for a time period after April 2002.

Should you have any questions concerning this letter, please contact Mr. William Riffer, Regulatory Assurance Manager, at (815) 415-2800.

Respectfully,

Charles G. Pardee  
Site Vice President  
LaSalle County Station

cc: Director, Division of Reactor Safety - NRC Region III  
NRC Senior Resident Inspector - LaSalle County Station
