UPDATED FINAL SAFETY ANALYSIS REPORT
REVISION 37

Pursuant to 10 CFR 50.71(e), Virginia Electric and Power Company (Dominion) submits Revision 37 to the Updated Final Safety Analysis Report (UFSAR) for North Anna Power Station. This revision also includes updates to Chapter 17 of the UFSAR, which contains the Operational Quality Assurance (QA) Program. The changes to the program description do not reduce the commitments contained therein or have been previously approved by the NRC under 10 CFR 50.54(a)(4).

One signed original, one paper copy, and four CD-ROM copies of Revision 37 to the UFSAR are enclosed. Each paper revision package contains replacement instructions and eight volumes of Revision 37 pages. The Revision 37 pages replace the existing text, tables, figures, and tabs as described in the instructions. Each CD-ROM copy includes the entire UFSAR in portable document format (PDF), UFSAR reference drawings in PDF, installation software that consists of Adobe Acrobat Reader (to access the PDF files), and an ASCII text README file that provides installation information.

Very truly yours,
