

Mr. E. R. Johnson
JAI Corporation
4103 Chain Bridge Road, Suite 200
Fairfax, VA 22030

Dear Mr. Johnson:

This is in response to your August 20, 2001, letter requesting that I speak at the 19th Annual Seminar on Spent Fuel Management, sponsored by the Institute of Nuclear Materials Management. Specifically, you requested that we present a paper discussing the status of U.S. Nuclear Regulatory Commission (NRC) licensing of spent fuel storage technologies in the U.S. during the morning session on January 10, 2002.

I am pleased to accept your invitation. Either I, or one of my staff, will provide an overview of the Spent Fuel Project Office, our responsibilities within the NRC, how our activities align with the NRC's Strategic Plan and Performance Goals, our responsibilities and the status of our reviews of interim spent fuel storage cask systems and transportation packagings, and in licensing independent spent fuel storage installations.

Please contact me to discuss logistics for this conference. I may be reached by telephone at (301) 415-8500.

I look forward to hearing from you in the near future.

Sincerely,

E. William Brach, Director
Spent Fuel Project Office
Office of Nuclear Material Safety
and Safeguards
U.S. Nuclear Regulatory Commission
