CHIEF EXAMINER COMMENTS ON WRITTEN OUTLINES FOR STP 9/01 EXAM

- Suggest changing font on SRO only questions to italics to avoid printing colors,
- There is one plant specific priority. There were several events involving operator errors while operating site electrical systems. See PI&R inspection plan for Inspection 01-07. Also, Neil O'Keefe or Paul Gage may have additional information on these events. We may want to replace 1 or 2 questions with questions in this area.
- Minor editorial comments are marked in red.
