Subject: Name Change

Michael,

License Nos. 29-00139-02, 29-00139-04MD, 29-00139-08

Docket Nos. 030-05222, 030-10750, 030-33066

Control Nos. 130401, 130396, 130397

Your October 3, 2001 letter requests a change in mailing address and a change in name. Request for name changes indicate to the NRC that a possible change of ownership (control) has occurred. Licensees must provide full information and obtain NRC's prior written consent before transferring control of the license. Control of a license is in the hands of the person or persons who are empowered to decide when and how that license will be used. That control is to be found in the person or persons who, because of ownership or authority explicitly delegated by the owners, possess the power to determine corporate policy and thus the direction of the activities under the license. A transferee is an entity that proposes to purchase or otherwise gain control of an NRC-licensed operation. A transferor is an NRC licensee selling or otherwise giving up control of a licensed operation. Provide the following information concerning changes of control by the applicant (transferor and/or transferee, as appropriate). If any items are not applicable, so state.

- a. Provide a complete description of the transaction (transfer of stocks or assets, or merger).
- b. Describe any changes in personnel or duties that relate to the licensed program. Include training and experience for any new personnel.
- c. Describe any changes in the organization, location, facilities, equipment or procedures that relate to the licensed program.
- e. Describe the status of the surveillance program (surveys, wipe tests, quality control) at the present time and the expected status at the time that control is to be transferred.
- f. Confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or to NRC, as appropriate. These records include documentation of surveys of ambient radiation levels and fixed and/or removable contamination, including methods and sensitivity.
- g. Confirm that the transferee will abide by all constraints, conditions, requirements and commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program.

Many of the questions above may not be relevant to your name change. Simply state such and provide justification.

We currently have Thomas M. Primm, Vice President, U.S. Manufacturing as the executive management contact person for your license. We note that Susan Voigt, Chair, Radiation Safety Committee and Senior Director, WWMG EHS has been signing recent initial correspondences. Should the contact person be changed to Susan Voigt??

Please submit a written reply to my attention at the Region I Office and refer to the Control Nos. above. If you have any technical questions regarding this deficiency e-mail, please call me at (610) 337-6952. You may send your response by facsimile: (610) 337-5269. If you choose to send your response by fax, there is no need to send us a "hard-copy" of your response by regular mail.
